Brellium uses AI to review every note against your strictest funder's latest requirements.

Surface and resolve compliance risks before they impact your revenue

Automatically audit 100% of sessions against clinical and funder requirements. Identify and correct high-risk documentation and issues early to prevent pre-payment reviews, avoid clawbacks, and reduce audit exposure.

Scale your QA without adding headcount

Manual audits are labor-intensive, prone to errors, and fail to scale with growing patient volumes. Brellum gives you complete visibility into documentation quality, so you can catch patterns early, reduce compliance risk, and drive meaningful quality improvements.

Improve documentation quality with targeted feedback

Send instant notifications to BTs and BCBAs when notes need corrections, along with clear instructions on how to fix them. Reinforce better habits over time with feedback that's specific, consistent, and built into providers' workflows.

Sleep better at night with payor clawback protection

Brellium is designed to meet rigorous compliance standards. In the unlikely event a payor claws back reimbursement on a Brellum-approved note, we'll foot the bill.

- ✓ Audit notes **13X faster**
- ✓ Reduce note review costs **by 98%**
- ✓ Reduce QA costs **by 80%+**
- ✓ **5X ROI**

Automatically detect and fix errors like:

- 97153 / 97155 incongruence
- Copy / pasted notes
- Note signing 24 hours after session
- Insufficient number of goals worked on per hour
- Use of academic language
- Mentions of non-therapy time
- And hundreds more
